I think its a mindset

Rajusulochana 01:21:43
Thanks for a great presentation, very informative and stimulating.

Meena Gallaria 01:21:49
To ensure sustainable consumption and production practices necessarily entails to respect the biophysical boundaries of the planet and to reduce current global consumption rates in order to fit with the biophysical capacity to produce ecosystem services and benefits. If consumption is reduced how will corporations become profitable?

Meena Gallaria 01:22:14
Global action and global cooperation to advance sustainable consumption needs to be approached by transcending the North-South divides and through the lens of respect for diverse values of well-being and sustainable living.
