

Institutional Distinctiveness

Total Quality Management: NMIMS has adopted a total quality approach to the entire academic process and environment. It lays emphasis on quality in every aspect. Going with its Vision to be a globally admired University, NMIMS tried to make each unit of the university excel in academics, motivate the faculty to undertake quality research, attract funding agencies to sponsor research projects and invite more consultancy projects. The 3rd cycle of NAAC accreditation with A+ grade in 2107 is a testimony to the same. Going ahead the university has taken a step forward to go in for international accreditations. NMIMS has planned ABBET accreditation as a quality yardstick for a select few engineering programs. It continues to maintain the standards laid down by AACSB accreditation for its management programs in 2018. The university continues to Introduce new methodologies and enable the use of ICT in all walks of the institution.
