Learning Management System (LMS)

Counselling Process

Mode of Counselling :- Face to face, on call and online

Brief describe the provision in LMS to be used by HEI :- In the LMS we have a section enabling students to connect with the institute through various means – call, chat, office address.

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :- <https://studentzone-ngasce.nmims.edu/studentportal>

Assessment mechanism	Across our programs we have various assessment mechanisms which include synchronous internal assessments, asynchronous assignments, project submissions and term end exams. All of the assessments are driven through various modules in our Learning Management System.
Identified technological interface and interoperability	LTI integration support is active for LMS
Learner's Authentication Requirements	Learners are allocated a unique student number once their admissions are confirmed. Students need to use this student number to login to the LMS at any point in time. A random new password is generated for the first login which is shared with the student, post which the student is shown a pop-up screen to change their password on their first login.
Learner Registration - through a web application	We have a detailed admission form which takes the learner through 6 different sections of information which needs to be filled and submitted to the institute. This form is completely online and can be filled either on web or mobile devices.

Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	In order to motivate students and push them into continuous learning, our students are assigned various badges for different activities, milestones and achievements done during the course of their program. These are further sharable on their social media. Secondly, we also have a ranking leaderboard at a subject and semester level to allow students to be more aware of their comparative positioning.
Payment Gateway –using Digital Payment system	We have multiple payment gateways linked to our LMS to allow students the flexibility and convenience of making online payments - PayTM, PayU and Billdesk. We are continuously monitoring the performance of the gateways to ensure easy payment experience for the students and disabling any gateway with high failure rates.
Tracking the delivery of a Course or programme	On our Learning Portals the students have a dashboard which lists the upcoming sessions with session numbers, upcoming activities like Internal Assessments, assignment submissions and TEEs.
Technical Know-how or Skills Requirements	User Experience is at the heart of our approach for developing any new features or modules. Hence, we consistently strive to design our LMS modules in a way to make the portal intuitive, usable and engaging with little need for any technical know-how.

Learning Platform

Learning Platform :- Non- SWAYAM

Provide details for sample module/unit :-

To allow our students to explore the LMS before they commit to the program, we encourage them to experience the LMS by filling in some basic details. Once they do, they can login to the demo app using their mobile number, email id or registration number. The demo app has a handful of lecture videos, academic calendar and overall functionality which the student can expect once they after signing up for the program.

Student details Login ID :- 7799999999

Student details Password :- ngasce@123

Teacher Login Details- Login ID :- NGASCE0419

Teacher Login Details- Password :- NGASCE@0419

Briefly write on ICT facilities available/ to be ready dedicated for the implementation of Online Courses :-

We have a web as well as mobile application for students. The complete lifecycle of the student from admission, academic delivery, assessment and certification is done through these online applications. The mobile application allows students to learn on the go whenever they have any time available.
