5. Curriculum includes the right mix of theory and practical knowledge.			✓		

**Any other Suggestions/ Comments:** I am currently working as a product manager, and the most important thing we have to do is read and analyze data, which I felt is missing in the curriculum. I found "The Capstone Project" at Pilot scale very interesting and it developed a sense of Business in the students. I think the college curriculum can be a bit more focused on the practical side.
